

Saving lives,
one drop at a time.

Blood products for felines and canines.

At Plasvacc, we're passionate about science, animals, and bringing the two together to protect and save lives. That's why we're proud to provide life-saving blood transfusion products for your feline and canine patients to help ensure a positive outcome.

Plasvacc. Peace of mind is in the bag.

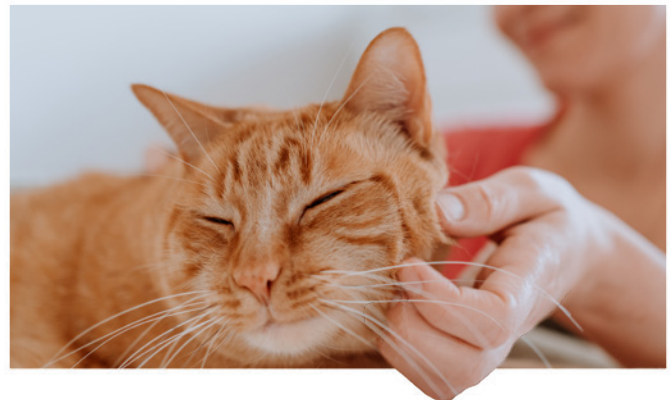

When everyone's counting on you, you can count on Plasvacc.

From our stringent purity and safety controls to the health and welfare of our volunteer donor animals, Plasvacc's veterinary blood products will help get your critical care patients home where they belong.

As a trusted provider of veterinary plasma products for over 35 years, Plasvacc USA is proud to add veterinary blood bank services to our product offerings for veterinarians nation-wide.

PURITY & SAFETY

Plasvacc Veterinary Blood Bank recruits young, vibrant, and healthy volunteer donors for our program. Each animal is a loved family companion that is thoroughly examined and extensively screened to ensure they are free of diseases. Additionally, blood typing is performed to reduce the likelihood of a reaction to the recipient.

BLOOD BANK PRODUCTS

- Feline whole blood, Type A or B, available in 50mL
- Canine whole blood, available in 250mL & 450mL
